

Solar System Project

Our class has been studying the solar system. The students in our class have been really enjoying this unit and are fascinated by all of the information they are learning. For those who are interested, I'd like to offer the opportunity to create a fun solar system project to be shared with the class. You and your child may create any solar system project they are interested in. Ideas for the project include, but are not limited to:

- Replicas of the solar system
 - Planet research poster
- Creative writing with facts about exploring space
 - Moon phase replica
 - Constellation replicas

There are tons of fun ideas on Pinterest! I have posted some of these on our class web page. **This is an optional project with a whopping 20 Talon Ticket reward! Students who do not complete the project will not be penalized.**

If you choose to do a project with your child, please send it in on or before Friday, October 9th.

Any questions or concerns, please don't hesitate to contact me!

Enjoy, learn, and have fun!
Miss Humphrey
